

Conserve 50 ml Omnifix® Luer Lock Syringes

B. Braun would like to ask for your support in preserving the use of 50 ml Omnifix® Luer Lock syringes for use in syringe drivers in critical care.

WHEN GIVING BOLUS DRUGS MANUALLY, NIVAS RECOMMEND THE USE OF A 10 ML, 20 ML OR 30 ML SYRINGE.

PLEASE ASK YOUR ORGANISATION TO **RESERVE THE 50 ML LUER LOCK SYRINGES, FOR CRITICAL CARE SYRINGE PUMP INFUSIONS, TO AVOID FUTURE STOCKS RUNNING LOW DURING THE COVID-19 PANDEMIC SURGE.**¹

TO HELP CONSERVE STOCK OF 50 ML LUER LOCK SYRINGES, PLEASE CONSIDER:

- Using luer slip syringes where possible
- For bolus administration of volumes less than 50 ml, using smaller sized syringes eg, 30 ml, 20 ml

TO ASSIST IN SUPPLY OF STOCKS ACROSS ALL BRANDS AND REDUCE CLINICAL DISRUPTION, WE RECOMMEND THAT YOU DO NOT RECONFIGURE YOUR SYRINGE DRIVERS TO AN ALTERNATE BRAND.
