Standard Endotracheal Tubes

The simple solution for your daily intubations

High-Volume, Low-Pressure

Low-Profile

Uncuffed

Pre-Stylet

Uncuffed Endotracheal Tubes

Designed for smaller airways.

Special depth lines at the distal tip indicate the depth of intubation. The smooth, molded, gently cupped tip eases intubation, while the tube is designed to soften at body temperature to conform to the airway anatomy.

- Single-use
- Sterile
- Not made with natural rubber latex
