Dear Customers,

Greiner Bio-One MHRA Derogation

Due to an unforeseen administrative error during the transition to MDR certification there was a brief interruption to the validity of the CE mark for certain Greiner Bio-One products and as such these lines had to be suspended from supply into the market. Greiner Bio-One has been working closely with the EU regulatory bodies, and the UK's Medicines & Healthcare Products Regulatory Agency (MHRA) and have secured a Derogation enabling supply to resume.

Please be assured that at no point during this process was product quality in question and the suspension of supply was necessitated for administrative reasons purely. Products can continue to be used with no further action from customers.

Should you require any further information please contact us at enquiries.uk@gbo.com.

Yours sincerely,

Greiner Bio-One Ltd
