## Important Notification: Code Transition Due to High Demand for References 404000, 403128 and 404428

Dear Valued Customer,

Despite our efforts to maintain sufficient stock during the transitional phase linked to the Medical Devices Regulation (MDR), demand for references 404000, 403128, and 404428 has exceeded projections, and our inventory is nearing depletion. As a result, we anticipate the need for a code transition to equivalent codes within our existing Hudson RCI® Large-Volume Nebuliser portfolio until June 2025.

A detailed table outlining the available alternatives is provided. Please note that some of these alternatives also have stock limitations and may only be able to support part of your monthly demand.

Item number	Description	Alternative item number	Description	% of the monthly demand that will be supported
404000	AQUAPAK,SW,1070ML,ST	403700	AQUAPAK,SW,760ML,ST	100% (supported for 404000 and 403700)
403128	ADAPTOR,28-98% LARGE VOL NEBULIZER,ST	403133	ADAPTOR,33-98% LARGE VOL NEBULIZER,ST	80% (supported for 403128)
404428	AQUAPAK,AEROSOL,SW,440ML,28-98% ADAPTOR,ST	403728	AQUAPAK,AEROSOL,SW,760ML,28-98% ADAPTOR,ST	80% (supported for both codes)

Please be assured that we are proactively taking measures to address this. Therefore, we kindly request your acceptance of the proposed code as a substitution option. This transition will not impact your current commercial conditions. The technical data sheets (TDS) for the two alternative products are attached to this communication for your reference.

Should you have any questions or concerns, please do not hesitate to reach out to our customer service team or your local Medline account manager.

We sincerely appreciate your understanding, continued partnership, and trust in our products, solutions, and services.

Kind regards,  
Respiratory Division
