	N/A.

<b>2. Reason for Field Safety Corrective Action (FSCA)*</b>	
2.	1. Description of the product problem*  During manufacture small plastic burrs have been identified inside the Guedel Airways, as shown below. <div style="display: flex; justify-content: space-around; align-items: center;">   </div>
2.	2. Hazard giving rise to the FSCA*  The device is potentially contaminated with small plastic burrs inside the Guedel or packaging from the manufacturing process. If the burr becomes detached and is inhaled, it could result in potential complications such as airway obstruction, tissue irritation, inflammation and infection.
2.	3. Probability of problem arising  High in the affected Lot number range.
2.	4. Predicted risk to patient/users  The risks associated with the identified fault have been reviewed, where the probability of harm is low, but due to the higher rate of possible occurrence we feel it is essential to address the issue promptly to further reduce the risk of any potential patient harm.
2.	5. Further information to help characterise the problem  N/A

2.	<b>6. Background on Issue</b> A non-conformance was raised for plastic burrs found inside the Guedel Airway during manufacture. The fault was caused by damaged production equipment contacting the inside of the Guedel Airway, which has since been corrected with no further problems identified. Further evaluation of products and manufacturing records has enabled us to confirm the range of products and lot numbers under this FSCA. No reports of this problem have been reported from the market to-date.	
2.	<b>7. Other information relevant to FSCA</b> N/A
