RE: FSN Namic Manifolds – Kimal Update

Dear Valued Customer,

We are writing to update you on the Field Safety Notice (FSN) affecting Namic Manifolds, including Kimal procedure packs that contain these manifolds.

Updated Warning Labels on Kimal Procedure Packs

Working with the MHRA and Medline (the manufacturer of Namic Manifolds), Kimal has secured approval to add a precautionary warning label directly to affected procedure packs. This approach is designed to minimise disruption to your procedures. We are currently completing the labelling process and will dispatch your packs as quickly as possible.

Option to Receive a Separate Sterile Manifold

We understand that some customers may not have alternative products available for use in non-emergency situations. Since receiving the FSN, Kimal has been working with Medline and other suppliers to make a separately packaged sterile manifold available to accompany your procedure packs.

We anticipate this option will be available from 12th May 2026, subject to freight and customs clearance timelines. We will keep you informed if this date changes.

Supply Arrangements in the Meantime

Until unaffected manifold stock is available from Medline, the following will apply:

- Procedure packs will be supplied with the updated warning label to minimise procedure disruption. If you also require a separately packaged sterile manifold, this will be supplied alongside your packs once available (see above).
- We currently expect to return to standard supply – with manifolds included in packs and no warning label required – by the end of June 2026.

Action Required

Please let your Kimal Sales Representative know whether you would like to receive a separately packaged sterile manifold alongside your procedure packs.

We apologise for any inconvenience this has caused and thank you for your patience and continued cooperation. Our teams remain committed to ensuring continuity of supply and will provide further updates as the situation develops.

If you have any questions, please contact your Kimal Sales Representative or our Customer Services team.

Yours sincerely,

Chris Rawnsley
