

Transition from Biogel® Super-Sensitive 975** to Biogel® Super-Sensitive 825**

Dear Valued Customer,

At Mölnlycke, we are committed to working in partnership with you to provide innovative solutions that support patient safety and meet the needs of healthcare professionals. To strengthen supply chain resilience and ensure continued access to trusted Biogel® protection, we are introducing an update to our Biogel® Super-Sensitive surgical glove range.

The current Biogel® Super-Sensitive 975** range will be phased out and replaced by the Biogel® Super-Sensitive 825** range. With the Biogel® Super-Sensitive 825** range available across multiple markets, this transition will help improve supply chain resilience for UK customers, while continuing to offer the same trusted Biogel® protection.

The new Biogel® Super-Sensitive 825** gloves are produced on curved formers to support a natural hand position. They also feature slightly thinner material to support tactile sensitivity and dexterity, and they offer a smooth surface with slightly reduced grip versus the current textured Biogel® Super-Sensitive 975** range, to suit a broader range of surgical specialties. Additionally, the new Biogel® Super-Sensitive 825** range is PPE-certified, demonstrating compliance with European Regulation (EU) 2016/425 on Personal Protective Equipment, which sets strict safety and performance standards, giving hospitals confidence in compliance and staff safety.

Please note that pricing will remain the same following this transition.

While the Biogel® Super-Sensitive brand name remains unchanged, please note that this update includes the following Mölnlycke® Product Code (MPC) changes. National Product Codes (NPC) remain the same.

Current products				Replacement products			
NPC	MPC	Brand	Size	NPC	MPC	Brand	Size
FTE1755	97555	Biogel® Super-Sensitive	5.5	FTE1755	82555	Biogel® Super-Sensitive	5.5
FTE785	97560		6.0	FTE785	82560		6.0
FTE786	97565		6.5	FTE786	82565		6.5
FTE787	97570		7.0	FTE787	82570		7.0
FTE788	97575		7.5	FTE788	82575		7.5
FTE789	97580		8.0	FTE789	82580		8.0
FTE790	97585		8.5	FTE790	82585		8.5
FTE1756	97590		9.0	FTE1756	82590		9.0

Our aim is for the new products to be available to purchase via NHS Supply Chain from June 2026 onwards, at which point we will begin transitioning customers. Please note that timelines for individual codes may vary depending on market demand, and you may receive a mixture of Biogel® Super-Sensitive 825** and Biogel® Super-Sensitive 975** during the initial transition period. Please refer to the MPC on the product packaging ahead of use.

We understand that changes of this nature will require action on your side, and we regret any inconvenience this may cause you.

We trust that the changes to our Biogel® Super-Sensitive surgical glove range will prove beneficial.

If you have any questions or require support during this transition, please contact your local Mölnlycke® Key Account Manager.

Thank you for your continued partnership.

Yours sincerely,

Jinene Sawyer
