

Urgent Field Safety Notice

Rociale Healthcare Limited

Various Procedure Packs Containing 1ml

Date: 14/07/2026

FSN 2026-02

Details of affected devices:

Becton Dickinson UK Ltd (BD) has issued DMRC - 40102707 for a Class 2 recall of Chloraprep 2% w/v / 70% v/v cutaneous solution 1mL applicator, with an expiry date up to and including May 2029. Rociale Healthcare has incorporated these medicinal products into the procedure packs listed in Appendix 1, all of which are affected by this Defective Medicine:

Description of the problem:

Becton Dickinson UK Ltd are recalling batches of Chloraprep 2% w/v / 70% v/v cutaneous solution 1mL applicators due to a potential breach of sterility in the packaging process. The recall applies to all batches with an expiry date up to and including 05/2029. Batches with an expiry date after 06/202 are not impacted.

This defect could increase the risk of the applicator device being contaminated with pathogens, which could lead to increased infection rates for the patients.

Action to be taken by the user:

Rociale are kindly requesting that customers remove the Chloraprep from the affected pack and discard in accordance with local medicinal product handling guidelines. Please log this issue on the Rociale customer complaint portal here: <https://www.rocialeacutecare.com/report-a-problem/>, advising us of the quantity affected and confirming that the Chloraprep has been discarded. If you would prefer to return the pack for a full credit, please let us know on the Portal after which our customer services team will organise the uplift and replacement.

Transmission of this Field Safety Notice: (if appropriate)

This notice needs to be passed on all those who need to be aware within your organisation, or to any organisation where the potentially affected products may have been transferred (if appropriate).

Please transfer this notice to other organisations on which this action has an impact, if appropriate.

Please maintain awareness on this notice and resulting action for an appropriate period to ensure effectiveness of the corrective action, if appropriate.
