Dear Customer

Re: UK Distribution Centre Transition to DSV Brackmills

We are writing to inform you of an important development within Mölnlycke's UK supply chain network.

Following a comprehensive and competitive tender process, Mölnlycke has selected DSV as its future logistics partner for UK distribution operations. As a result, our UK Distribution Centre operations will transition from CEVA Logistics in Corby, Northamptonshire, to DSV's facility in Brackmills, Northamptonshire.

DSV is a leading global logistics provider with extensive expertise in warehousing, transportation and supply chain solutions, including specialist healthcare logistics. If you would like to learn more about DSV and its capabilities, please visit [Healthcare logistics | DSV](#)

Mölnlycke already enjoys a strong and successful partnership with DSV across several European markets, where they provide warehousing and distribution services that support the delivery of our products to customers and patients. We are therefore delighted to expand this partnership into the UK.

By combining Mölnlycke's commitment to improving patient outcomes with DSV's specialist logistics expertise, robust processes and operational capabilities, we will continue to strengthen our supply chain network and build a reliable, compliant and scalable solution for the future. Together, we are committed to ensuring our products remain available where and when they are needed, helping healthcare professionals deliver the best possible care to patients.

Transition planning is already well underway, with Mölnlycke, CEVA Logistics and DSV working closely together to ensure a seamless transfer of operations. We would like to take this opportunity to thank CEVA for their continued support, professionalism and collaboration throughout this process.

UKCO0063

Our planned go-live date at the DSV Brackmills facility is **Monday 2 November 2026**.

Between now and go-live, our teams will remain fully focused on maintaining continuity of supply and minimising any disruption to customers. Comprehensive transition plans are in place to ensure service levels are maintained throughout this period.

Importantly, there will be **no change** to your existing ordering processes, customer service contacts or the way you interact with Mölnlycke as a result of this transition. Your usual Mölnlycke contacts will continue to support you as they do today.

Over the coming weeks, we will provide further updates, including details of our delivery plans for Weeks 44 and 45, to ensure you have full visibility of any activities that may affect your orders.

Thank you for your continued partnership and trust in Mölnlycke. Should you have any questions regarding this transition, please do not hesitate to contact me or your usual Mölnlycke representative.

Kind regards,
