# Carbon Reduction Plan (CRP)

## CRPs Need to Comply with the Technical Standard Laid Out in PPN 006

### Commitment

- Confirm the bidding supplier's commitment to achieve net zero by 2050 or earlier for their UK operations at a minimum.

### Emissions Data

- Provide the supplier's current emissions for their UK operations at a minimum, for the sources included in scope 1, and 2 of the GHG Protocol, and a defined subset of scope 3 emissions.
- The five relevant GHG Protocol scope 3 categories are: upstream transportation and distribution, waste generated in operations, business travel, employee commuting, downstream transportation and distribution.
- Suppliers may provide additional categories of scope 3 emissions if the above categories are included and clearly identified. Provide emissions reporting in CO<sub>2</sub>e (carbon dioxide equivalent) for the seven greenhouse gases covered by the Kyoto Protocol (carbon dioxide [CO<sub>2</sub>], methane [CH<sub>4</sub>], nitrous oxide [N<sub>2</sub>O], hydrofluorocarbons [HFCs], perfluorocarbons [PFCs], sulphur hexafluoride [SF<sub>6</sub>] and nitrogen trifluoride [NF<sub>3</sub>]).

### Future Plans

- Set out the environmental management measures in effect, including certification scheme or specific carbon reduction measures adopted.

### Sign Off

- Be board approved or company director approved if no board is in place
- Be clearly signposted and published on the supplier's website
- Be updated regularly - at least annually.
