

NHS Supply Chain needs your help to maintain successful deliveries to your hospital

You can help us by:

- Delivering cages to their respective destinations as soon as possible.
- Emptying cages of all goods and returning them to a designated delivery location, for collection by the next NHS Supply Chain vehicle.
- If necessary, securing roll cages together with a chain and padlock to prevent improper use or removal by parties other than NHS Supply Chain.
- Reporting any concerns regarding cage returns to your regional Customer Service Team.
- Comply with any request from our Customer Service Team to make cages available for collection.

Please ensure:

- Roll cages are not used for the collection of either clean or soiled linen.
- Roll cages are not used for storage of goods, equipment or filing medical records.
- Third parties do not use or remove roll cages from your site.
