## PRODUCT MODIFICATION CHANGE OF PACKAGING SIZE

Dear Customer,

Sustainability matters to Greiner Bio-One. This is why we are continually striving to improve our offering in order to have a positive effect on the environment.

We have therefore chosen to implement some changes to the packaging of all versions of the VACUETTE® SAFETY Blood Collection Sets. This will optimise the units per pack, case and pallet which will reduce the environmental impact of the product.

### THE NUMBERS SPEAK FOR THEMSELVES:

Based on the current annual global production of SAFETY Blood Collection Sets, our change will achieve:

- / 74 fewer container trucks per year
- / 129.990 kg reduction in packaging material (for the shelf box and shipping carton) per year

Due to the change in the number of pieces within our packaging units, **NPC / item numbers will be changed, please see the tables on the following pages.**

making a difference

In addition to the sustainability benefits, our products will be packaged in a new, fresh layout with the graphic instructions for use on the shelf box, so that they are always immediately available. Furthermore, the packaging and labelling design, eg: content and symbols, have been updated to ensure conformity with all regulatory requirements set out under the new Medical Device Regulation.

A full list of affected products is available on the following pages.

If you have any questions, please do not hesitate to contact either your local Greiner Bio-One Account Manager or [sales.uk@gbo.com](mailto:sales.uk@gbo.com)

Yours sincerely  
Greiner Bio-One
