

# Information for Clinical Choice

## Sterilisation Reel Flat

Support Document

### Introduction

Information for Clinical Choice (ICC) has been developed to assist Clinicians in the decision-making process when assessing the suitability of a product by providing a clear illustration and description of the features of a range of similar products supplied through NHS Supply Chain.

The criteria provided, in the form of a Product Matrix and Support Document, is the result of a product review conducted by the clinical team in the Category Management Service Provider with support from clinical stakeholders from across the NHS as part of our assurance process.

The aim, alongside delivering savings back into NHS frontline services, is to ensure that clinical choice remains at the forefront of any product switching decision.

Sterilisation reel flat come in various widths and a couple of lengths, being 100 meters and more commonly 200 meters. The exception being the 70 meters ones which offers the highest strength and puncture resistance.

These are suitable for creating easy and reliable sterilisation packaging of surgical instruments in varying lengths.
