

Managed Equipment and Clinical Service Solutions (MECSS)

National Framework Agreement
OJEU Reference: 2021/S 000-019257
Launched 10 January 2022

This framework agreement offers access to services which provide fully bespoke managed equipment and clinical service solutions within, but not limited to, an imaging or theatre environment. These services, provided with or without staff, can support meeting key service-related targets and help reduce patient backlog, resulting in the potential for quicker patient diagnosis.

- You** choose the service provision
- You** choose the length of the contract
- You** choose the supplier.

What do we cover?

Staffed and unstaffed Mobile and Modular Services located on or off customer site.*

Clinical Solutions located on or off customer site.*

Community Diagnostic Centres - 'one stop shops'. These centres can be created in the community, closer to the patient to enable them to receive the diagnostic testing they require in one place, reducing diagnosis times.

Managed Equipment Services supplying equipment in areas including but not limited to, Imaging, Radiology, Endoscopy, Decontamination, Medical Devices, Radiotherapy and Robotics.

Managed Maintenance Services maintaining equipment in areas including but not limited to, Imaging, Radiology, Endoscopy, Decontamination, Medical Devices, Radiotherapy and Robotics.

Ultrasound Services.

Medical Diagnostic Reporting including tailored Lung Health Check reporting.

Lithotripsy Services.

Clinical Rooms to provide services such as Chemotherapy treatments.

Professional Consultancy for Managed Services.

Access for turnkey and enabling works.

Benefits of using our framework

- We deliver revenue-based equipment replacement programmes - Managed Equipment Services.
- Delivery of Community Diagnostic Centres, decreasing patient diagnosis times.
- Delivering end to end (booking, scanning, and reporting) National Screening Programmes such as Lung Health Checks.
- Providing savings opportunities via Multi Trust Aggregation, enabling customers to combine their service requirements to drive better value.
- We can bridge the gap of old equipment being decommissioned and new equipment being installed.
- We provide patient services during an emergency, where a fixed site becomes inoperable.

* (including but not limited to CT, PET CT, MRI, Mammography, Bone Densitometry, X-Ray, Endoscopy, Decontamination, various clinical applications such as Orthopaedic, General Surgery, Gynaecology).
