

Dear Customer,

Thank you for your recent enquiry regarding opening an account with NHS Supply Chain.

NHS Supply Chain provides customer-focused healthcare products and supply chain services to the UK's National Health Service (NHS), enabling trusts, hospitals and other healthcare organisations to focus on patient care.

Key benefits include:

- · Award-winning online ordering system and electronic catalogue
- · Access to over 315,000 competitively priced products
- · Regular scheduled deliveries to meet your needs
- Dedicated customer service support.

Under the terms of our charter, NHS Supply Chain is only able to provide this service to front line patient care providers. It would therefore be most helpful if all the fields indicated on the attached application form could be completed as this will enable us to process your application in a timely manner.

NHS Supply Chain delivers to a wide variety of Healthcare locations from Hospitals to small GP clinics and Dental surgeries. It may therefore be necessary to carry out a road and access suitability assessment and to confirm where you would like your goods delivering. If this is required for your location, we will carry out the survey when making the first delivery.

Once we have approved your account application we will contact you to help you place your first order and enable you to get the most from our products and services. Please note orders over £120 are delivered free of charge, orders below £120 will incur a charge of £7.50 towards the cost of delivery. Payment terms are 30 days from date of invoice.

As an added benefit for registered Charities and NHS charitable funds we can offer VAT zero rating on medical/scientific items, so please ensure that you complete our 6 month certificate and return with your application form.

If you have any further queries then please do not hesitate to contact us.

Yours sincerely, National Admin Team
