National Audit Office reveals disparities in UK hospital medical equipment prices

The National Audit Office (NAO) has disclosed significant price variations among UK hospitals for identical medical equipment.

NHS 'not using its spending power to the full' – report

A report has highlighted that the service is not making the most out of its collective spending power.

National Audit Office

The NAO is the UK's independent public spending watchdog.

- Supports Parliament in holding the government to account.
- Helps improve public services through its audits.

<https://www.nao.org.uk/reports/nhs-supply-chain-and-efficiencies-in-procurement/>

Conclusion on value for money

22 While Supply Chain has the potential to secure further savings for the NHS, it is not yet fulfilling that potential. Delivering the right products for the NHS at the cheapest sustainable price is essential to make every pound count for patients. Supply Chain should be in a very strong negotiating position. If it can persuade as many trusts as possible to purchase as much as possible through Supply Chain it can aggregate a large majority of NHS spending power.

23 Supply Chain recognises that its systems and processes do not work well for all its customers and that it needs to do more to become, and demonstrate that it is, the best-value option for NHS procurement. To do this, it needs to optimise prices for customers, make ordering as straightforward as possible and deliver reliably on orders placed. Trusts in turn need to make the most of the purchasing efficiencies that Supply Chain offers. While NHSE has started to take some positive steps to encourage and, where it is able, require trusts to make better use of Supply Chain, it recognises that it could do more in some areas, such as providing clinical sponsorship and standardisation of prices. NHSE also needs to be clear on the roles and responsibilities of all parties in the system and ensure that they are aligned.

“**24** We make the following recommendations to assist NHS Supply Chain (Supply Chain) and NHSE with working towards greater efficiencies in procurement.”

- a) NHSE should draw on the new HM Treasury guidance The Government Efficiency Framework, to set up a system of validation and assurance of Supply Chain’s reported savings towards the £1 billion target. This should include agreeing the relevant elements of Supply Chain’s reported savings with trusts so that there is one version of the truth with regards to savings.
- b) NHSE should set out how it will incentivise and steer trusts to make best use of procurement through Supply Chain.
- c) NHSE should work with the trusts that do not submit data on their spending to help them overcome the barriers to submitting, with the aim of making data on spending through and outside of Supply Chain as complete as possible.
- d) NHSE should proactively and directly use its data on trusts’ spending through different procurement routes to understand why trusts are not using Supply Chain and to encourage trusts to make greater use of Supply Chain.
- e) Supply Chain should run its transformation as a structured programme for its full duration, identifying and reporting on costs, benefits, dependencies and risks.
- f) By the end of 2024, Supply Chain should improve its understanding of why customers are unsatisfied with its services and develop a targeted action plan to make substantial improvements in satisfaction.
- g) As far as they are able to do so, NHSE and DHSC should speed up the appointment processes for Supply Chain’s recruitment of senior staff.

Customer Executive Director
NHS Supply Chain

Buy Smart Excellence in Sourcing

- Insource procurement activity across the clinical areas
- Launch the procurement centre of excellence
- Increase resource across the Supplier Relationship Management team including Innovation
- Embed Clinicians across the category teams
- Redesign Customer Voice in Category Strategy

Supply Right Excellence in Supply Chain and Inventory management

- Retender the logistics contract
- Restructure the entire organisation, underpinned by technology
- Strengthen the Sustainability Team
- Further resource the Resilience team
- Enable in-trust **Inventory** Management & Point of Care capabilities

Partner Expertly Extend our coverage to support wider parts of the health system

- Reshape the Customer Directorate, building capability across the teams
- Develop Out Of Hospital solutions
- Expand Voice of the Customer Team
- Introduce a Care Pathway Team
- Further focus on data insight technology and capabilities

Customer Centric Digital Strategy

Our priority is to develop strong foundations, ensuring our capability to deliver meaningful impact

Team Capabilities

Develop our team with a comprehensive range of digital skill sets, experience, capacity

Insights and Knowledge

Utilising various sources of data to challenge ourselves and drive fact-based decisions

Ways of Working

Collaboration and co-design with our customers as a BAU way of working

Landscape View

Design for the experience for real life, across multiple touchpoints and changing needs

Technology and Platforms

Implement new, digitally flexible technology to enable faster delivery and optimisation

Delivering with Priority and Pace

We have an urgent need to replace our catalogue, so this has been our immediate priority

We want to get the new digital platform into the hands of those that use it sooner

- Co-designed with 6 partner pilot trusts
- Iterative feature by feature drops to prove out designs in real life whilst mitigating change risk
- Contemporary and intuitive design, with mobile responsive view from day 1
- Faster, more resilient technology platform

Additional 'early access' pilot trusts to be invited and onboarded from Summer 2024

Partner expertly with our customer - holding influence and key relationships internally to source expert support

Deliver value to the NHS

- Focus on end-to-end value, including, but not limited to cash releasing savings
- Identify opportunities for increased value based on projected demand and benefit for the whole ICS system, rather than on historic usage, tailoring the opportunities based on the needs of the ICS and its population and priorities

Align our structure to ICS

- Scale our activity and focus to ICS level
- Develop our reporting capabilities to provide greater insight and potential opportunities

Develop ICS wide relationships

- Developing relationships beyond finance and procurement to support ICS priorities moving to a mutually beneficial partnership model

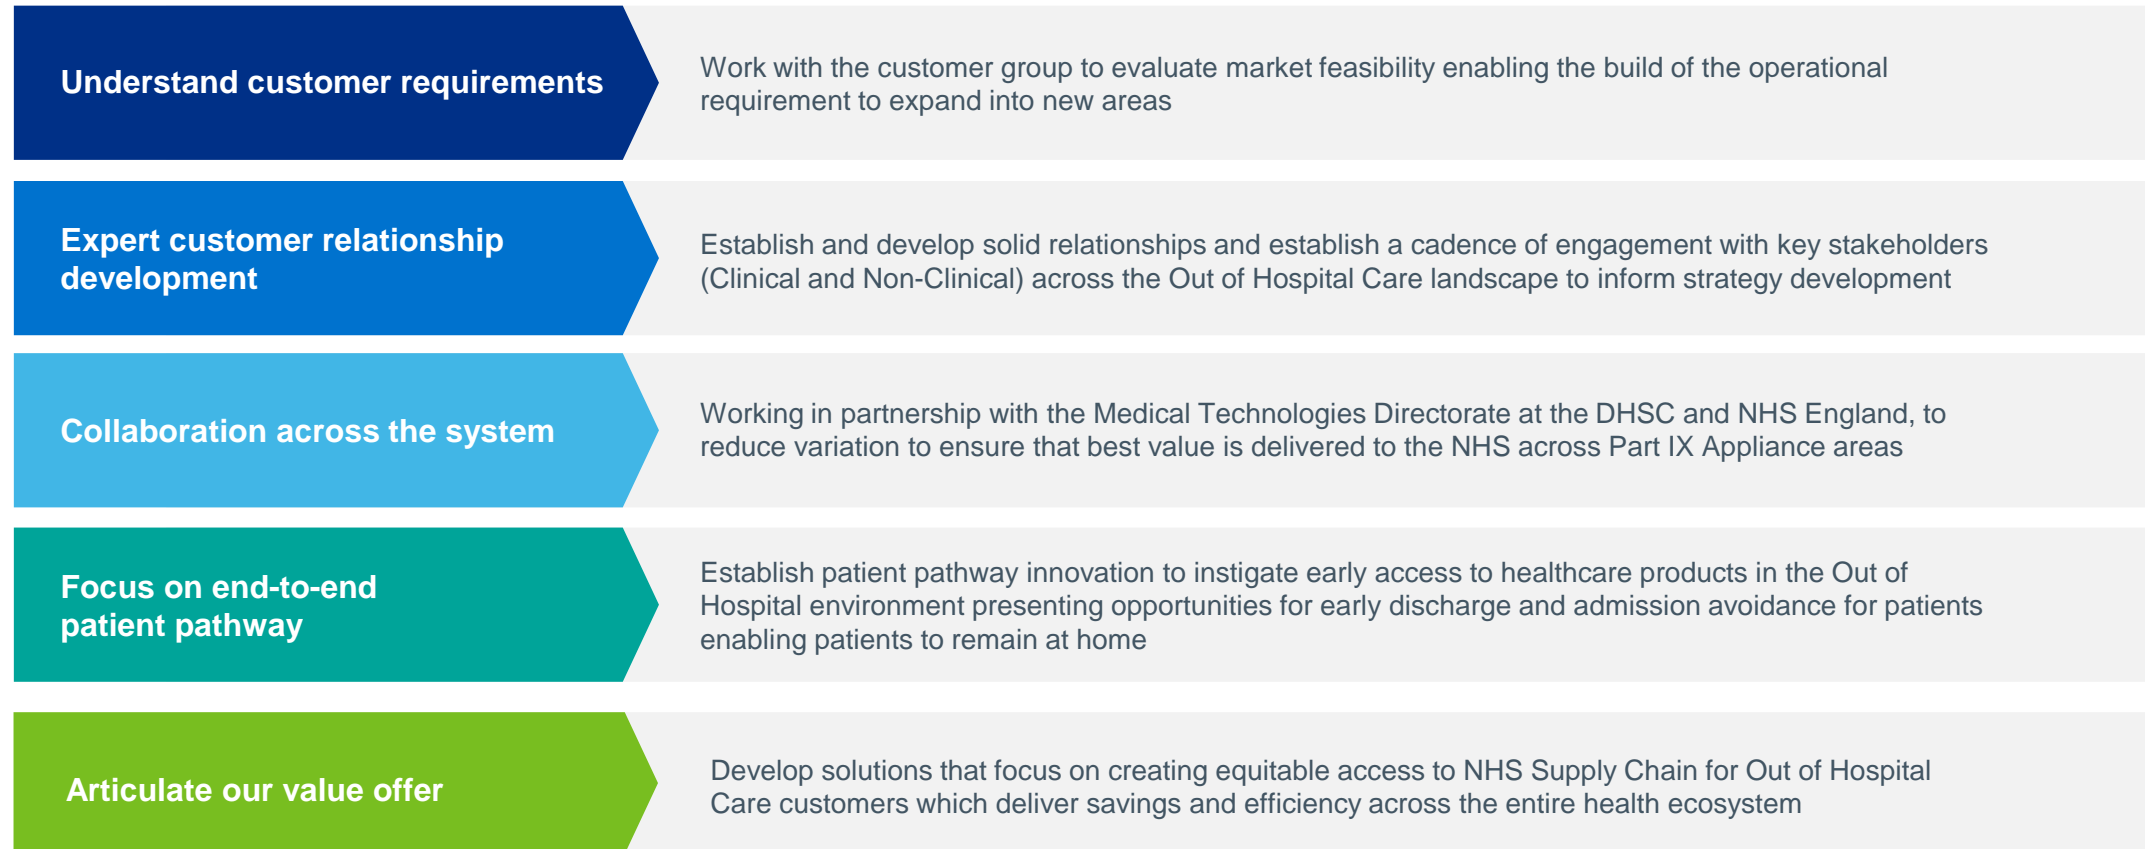

Develop capability of our people

- Embed the 'Customer Academy' building capability across the team to support the evolving needs of our NHS partners and care providers

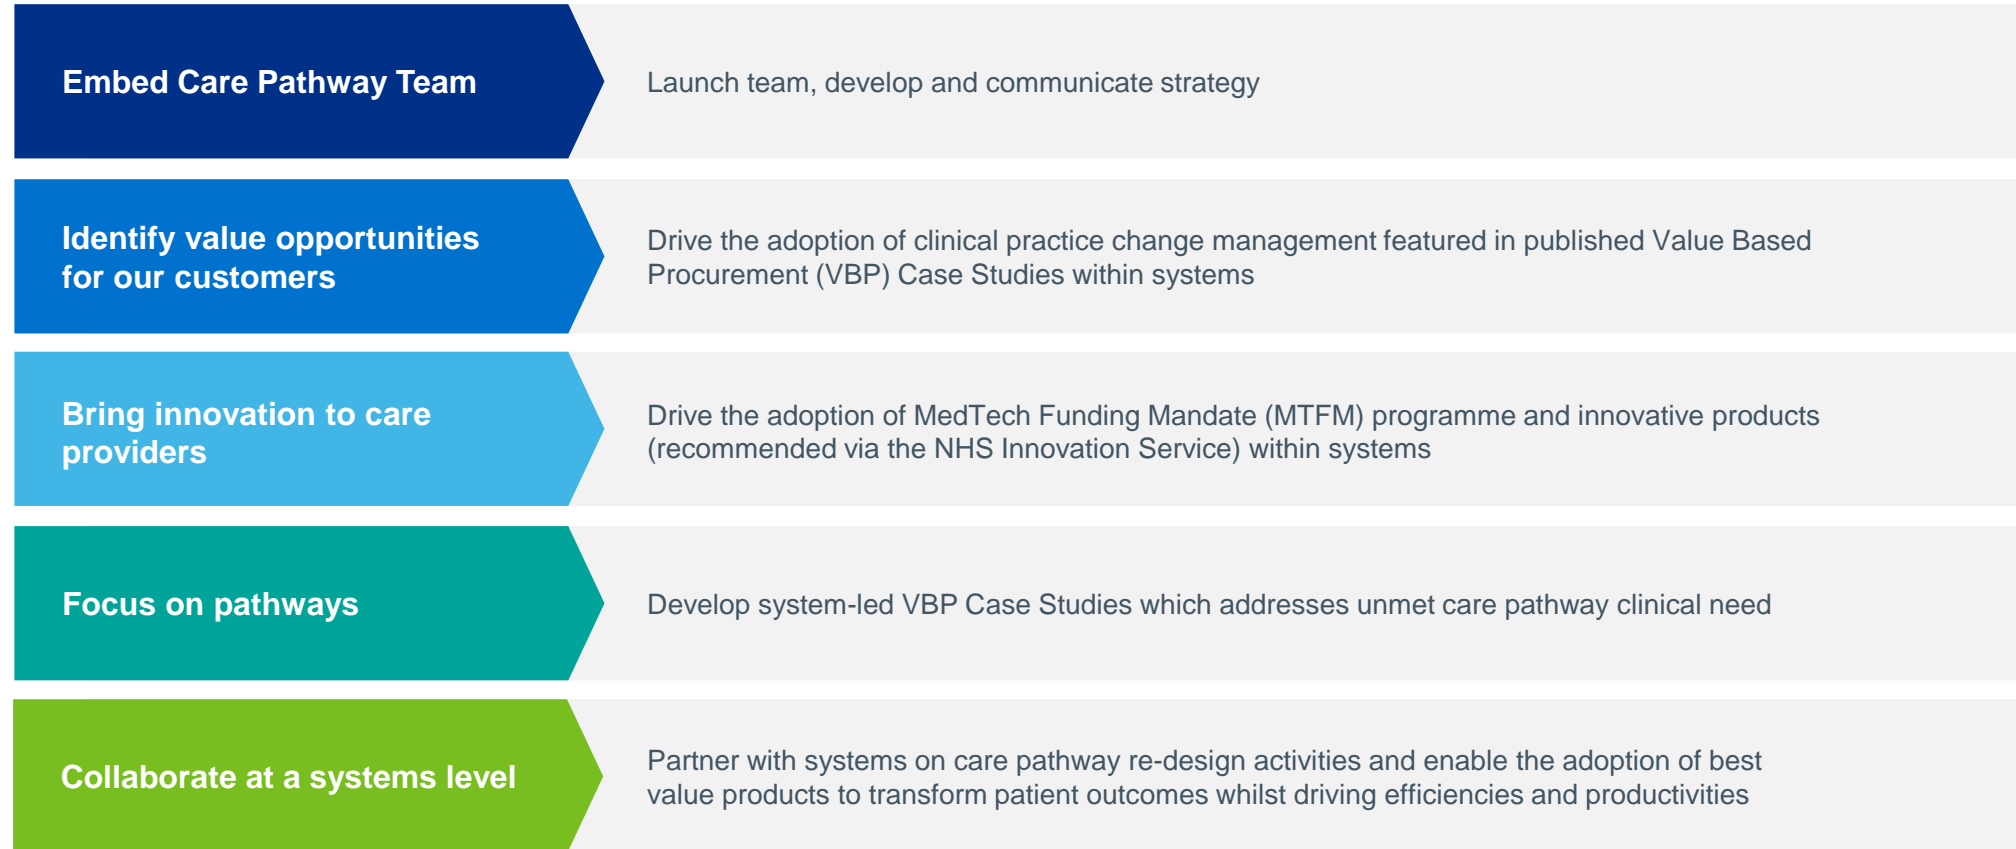

Articulate our value offer

- Develop a baseline of service delivery to our customers with clear demonstrable value

Develop our strategy to support providers Out of Hospital

Partner expertly with our customer to unlock clinical value through enhanced patient outcomes and system efficiencies

Ensuring the customer voice is embedded in every decision made across the organisation

Partnering Expertly to Deliver Greater Value

We recognise the need to develop our partnership working with you as ICSs mature.

As part of our enhanced engagement model, we have developed a new '**Partnership Way of Working**' approach that can deliver value at scale and pace, driven by greater commitment and resource from an ICS and NHS Supply Chain.

We are seeking two pilot ICSs to work with us as pilot customers over the next three months. If you are interested, please contact hamish.makanji@supplychain.nhs.uk to arrange a scoping call.

Technology Transformation

Matthew Wynn

Where are we today?

- Complex suite of legacy systems
- Lack of investment over an extended period means a larger gap to bridge through modernization
- Interlinked with Service Offer - technology is a key enabler for our future plans and strategy
- A mix of 'big boulder' programmes and multiple 'smaller rock' initiatives needed to move us forward
- Continues to be complex and will require ongoing focus and investment for the next three to five years to deliver
- Not just an NHS Supply Chain challenge as change also needed across the wider system

FY 2023 / 2024: Key Priorities and Technology Changes

**Catalogue, EDC
and EDI
improvements**

**New WMS and
Gorse Point**

**Savings
Reporting**

**Direct
Shipment
Stability**

**Finance Cloud
Platform**

**Digital
Platform**

This year our focus has been on embedding the implementation of new Oracle solutions for eDirect, commissioning the new Warehouse Management System (WMS) and Digital Platform and modernising our financial systems and savings reporting solutions.

In parallel, we've delivered multiple changes to improve customer facing tools and systems, driven by your feedback.

Technology Modernisation - Looking Ahead

FY 2023 / 2024

FY 2024 / 2025 to FY 2027 / 2028

Catalogue and existing channel resilience

Digital Platform roll out
Trust by trust transition to new platform from legacy catalogue

HDS re-platforming
Transaction and order system modernisation

EDI and eDC: ongoing platform improvements and channel migration

New WMS and Gorse Point

Logistics modernisation:
Network redesign, transport and fulfilment model
Demand and supply planning, Network wide deployment

Digital service channels

Direct Shipment Recovery

Supplier Integration Programme:
Improve integration with suppliers and customers leading to real time accuracy on product, contract, lead time, price and real time data. Supplier inventory data for non stock

Finance Fusion

Back office simplification:
Process reengineering, pricing simplification and automation across our organisation. Using real time data to run operational processes - delivering consistency and more efficient ways of working

Reporting: Migration of legacy reports to new technology including TR reports

NHS Supply Chain TOM

Commercial platforms and analytics tools

Capital and diagnostics:
End to end systems re-platforming

Direct framework: migration off Resus

Key outcomes:

Single digital front end for customers (microservice led)

Modern supply chain systems and capability

Real time data driven decision making and analytics

Eradication of off system (Excel and Access) solutions

Critical systems (Resus, SCDB, eCommerce) decommissioned

Infrastructure and network transformation enabled

Headlines:

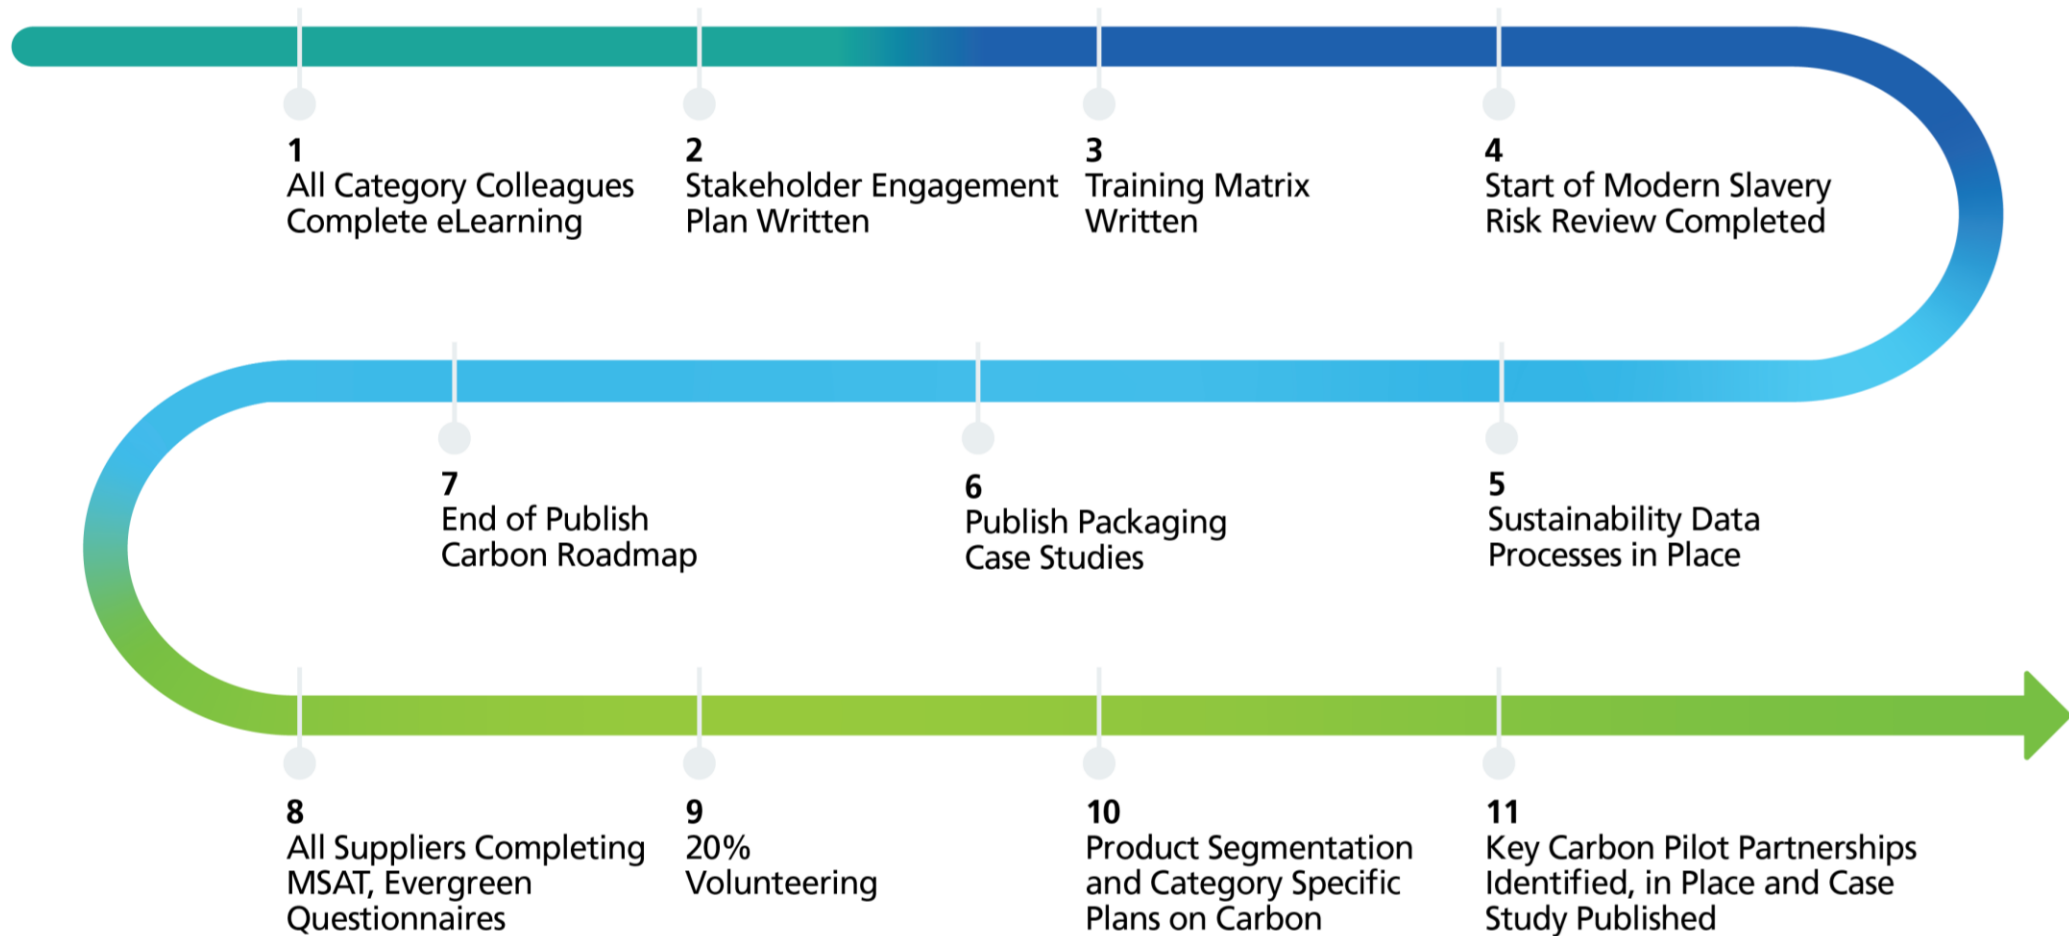

- Our IT modernisation agenda is complex and spans the breadth of NHS Supply Chain
- Key customer requested improvements can only be enabled with the move away from legacy IT
- The ongoing support of the wider NHS to adopt new standard solutions and adapt existing interfaces is critical
- Multi-year investment and funding is needed to deliver as planned

Buying Smart To Meet The Needs Of The NHS

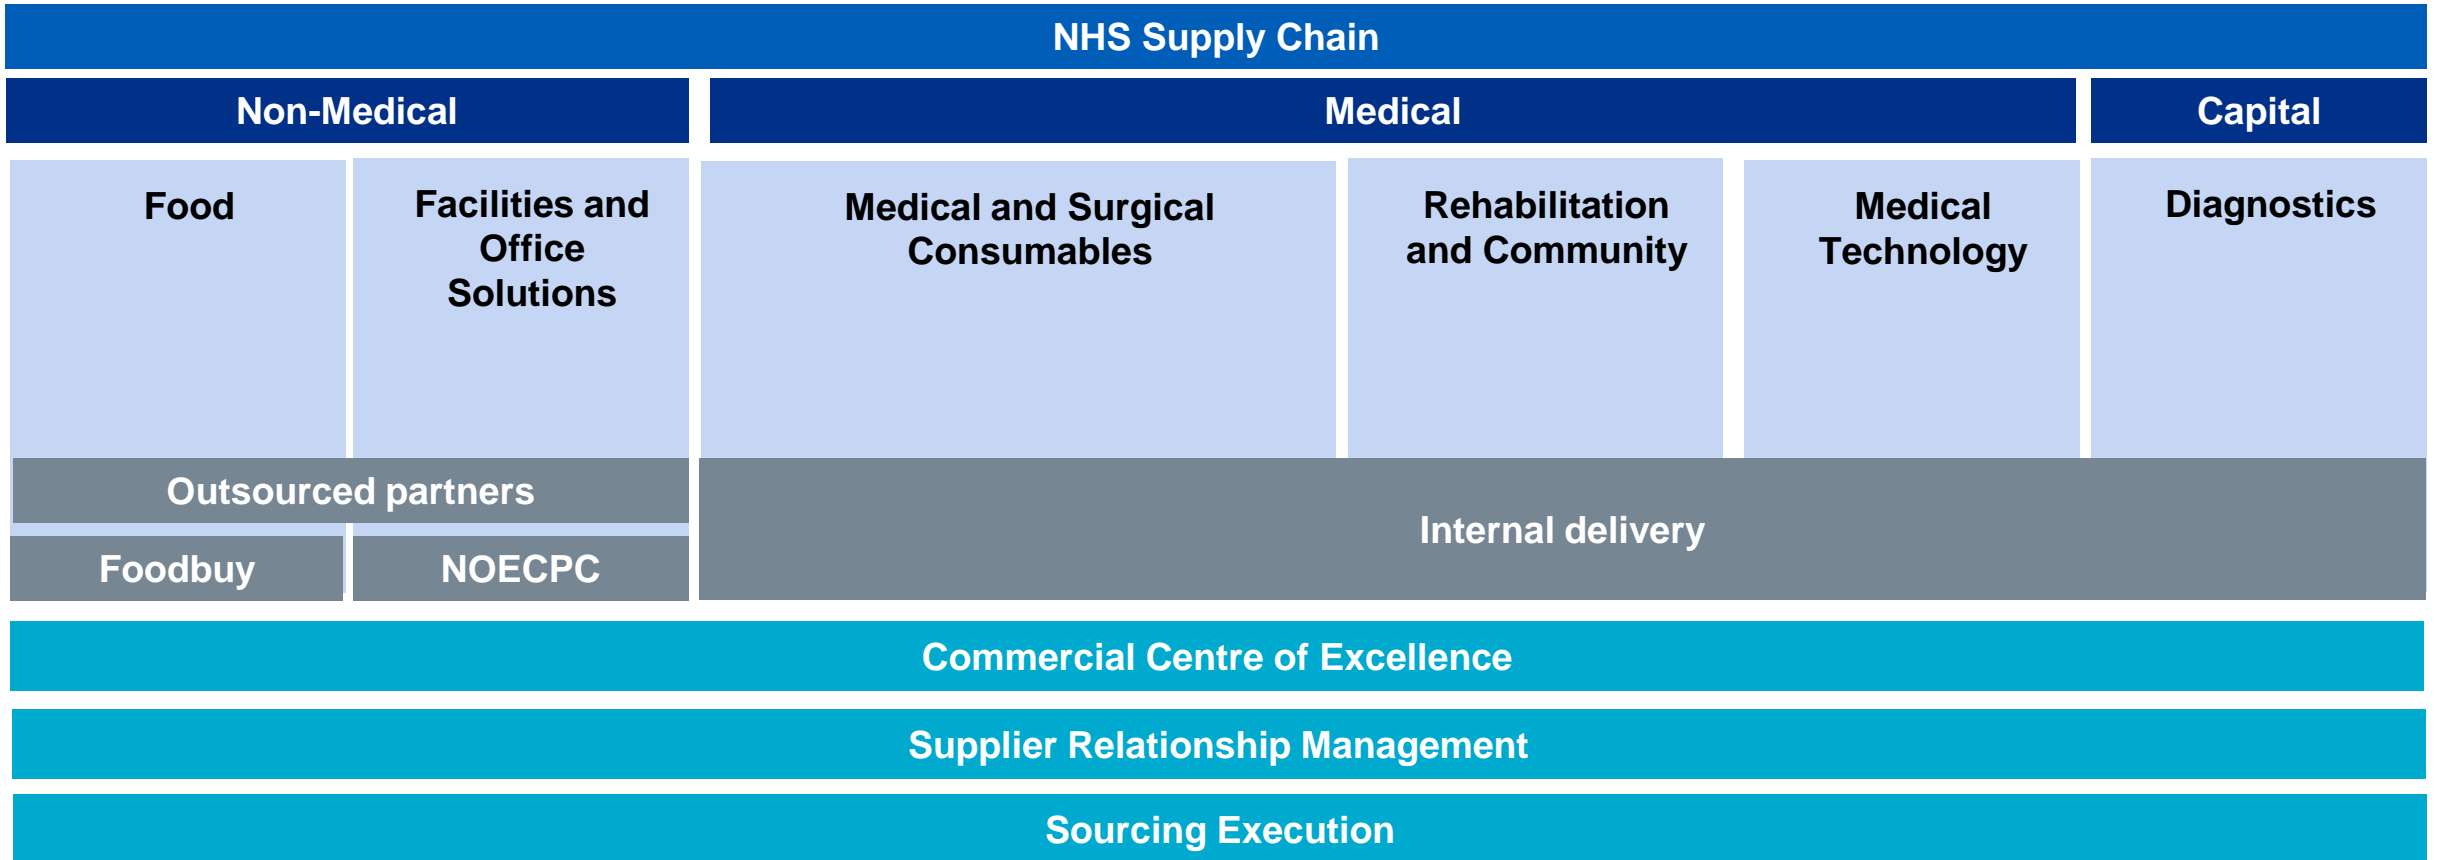

Bilal Shaykh, Simon Smith

Commercial Team Evolution

Creation of a standardised and consistent approach to ways of working for procurement, irrespective whether in-house or outsourced, to drive commercial and procurement excellence and development of a 'One NHS Supply Chain' culture.

Commercial Team Overview

Our People

- Train, equip and develop our people
- Create the capacity to allow our people to make the biggest impact
- Create the culture and operating environment that retains and attracts talent

Digital Transparency

- Enable our aspirations through creating the foundations of strong source data
- Capitalise on all opportunities to use data as a strategic asset
- Identify and implement the tools that will drive efficiency and excellence in our commercial activity

How We Work

- Evolve and simplify our ways of working to drive best practice
- Optimise our supply chains to build in resilience, sustainability and cost transparency
- Focus our category strategies and commercial planning at a system level
- Embed the clinical voice throughout our commercial activity
- Drive compliance within an expanding regulatory framework

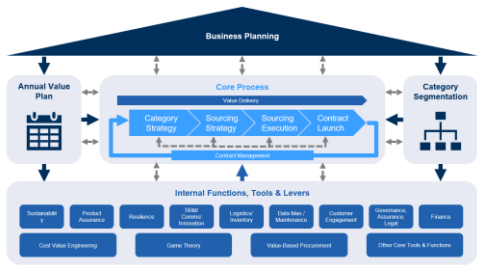

Influence and Scale

- Utilise all levers at our disposal to manage budgetary pressure, drive system value and innovation
- Ensure we leverage our scale to drive resilience in all our commercial activity
- Use our influence and scale to re-balance the market and our relationships
- Lead the development of a core list

*Fully aligned to both the GCF and NHSE Strategic Framework

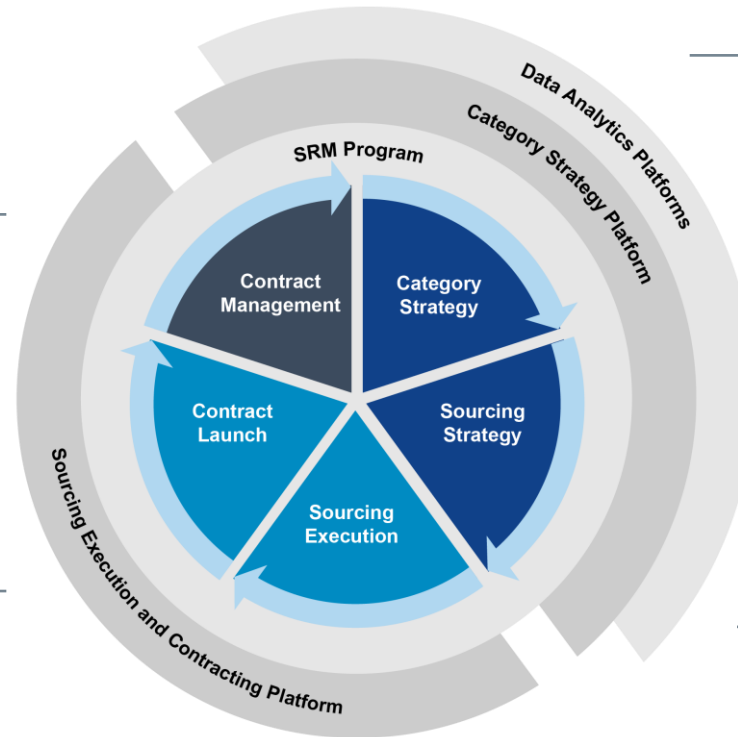

The purpose of the CoE is to provide the Commercial function with the means to drive world class standards:

- What we do best
- What external benchmarks do best, that we can adopt
- What works for the NHS

Developing our processes and Governance

Building our capability

Driving consistent standards and performance measures

Maximising opportunities to utilise data

Transforming our approach to product assurance

We Are Navigating a Complex Operating Environment

Our operating environment is continually evolving, and as we flex to manage this, and meet the growing needs of the NHS, we need to balance short term affordability, with investment in the longer term to drive further efficiency and value from our end-to-end supply chain into the NHS.

Geopolitical stability

Challenges to globalisation and traditional resilience models through instability and trade issues

Regulatory pressure

Increasing requirements to align to legislation and meet regulatory demands

Sustainability

The increasing drive to deliver Net Zero by 2045 and reducing globally inequality

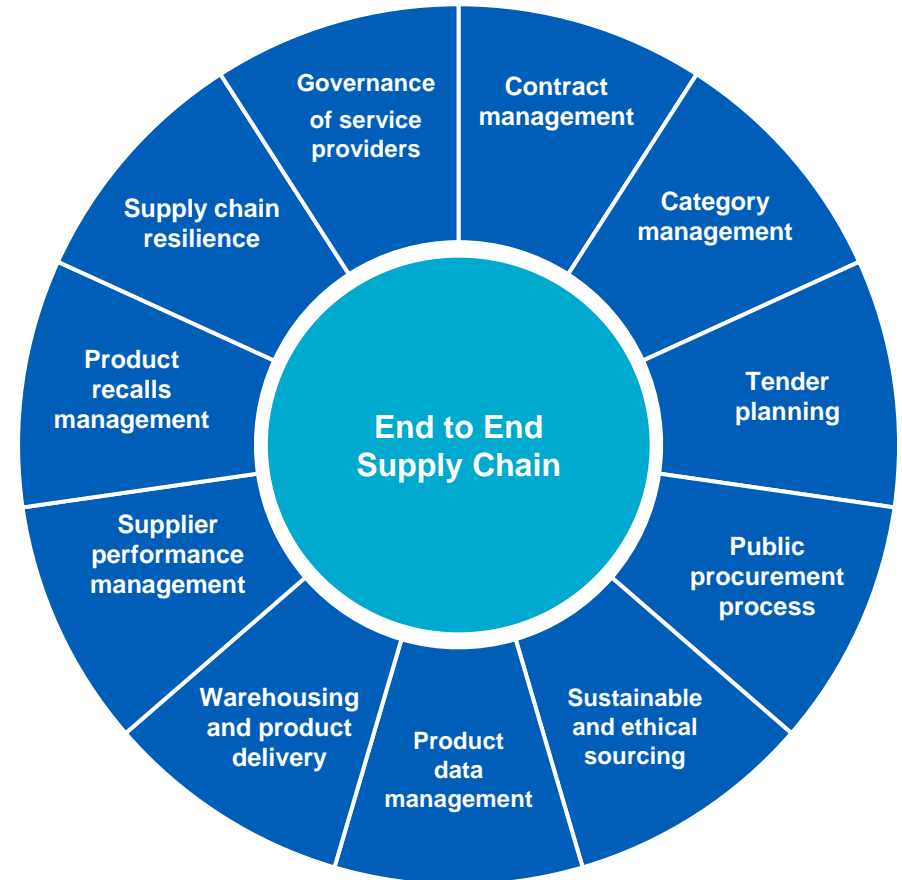

Economic performance

Economic headwinds to gather momentum with systemic impacts on commodities, pricing, our people and the health care system

Offering Wider Commercial Value

Through our unique position as the **national provider to the NHS** we are working to give you the assurance that:

- Our customers will have absolute confidence that when they need a product, it or a clinically assured equivalent product will be there.
- The products we provide will be clinically assured and only be from suppliers whose sustainability aspirations on net zero align to those of the NHS, that modern slavery shall be eliminated from their supply chains and that the products we provide will be provided at the optimum cost.
- We will be at the forefront of enabling innovation, removing any blockers to bringing the best products to market for our customers as quickly as possible.
- We are using our influence and scale to shape supplier relationships and behaviours as well as leading conversations with policy makers at a system level.
- Through our category teams and Centre of Excellence we are actively benchmarking ourselves to raise standards and drive commercial best practice.
