# National Clinical Advisory Forum

---

Key Messages

# Key Messages – June 2026

## **Strong support for national clinical-commercial alignment**

Forum is keen to support topic areas for the new DHSC/NHSE commercial clinical advisory group - can review detail and act as critical friend (regional representation).

## **Driving Standardisation Through Centre-Enabled Buying**

Centre enabled buying - keen to promote standardisation and reducing unwarranted variation where the data and evidence base is available and compelling. Good example: GiRFT's Academy Resources of best outcomes incorporates route to national procurement (centrally enabled buying)
