

# eDC Android Release Notes

18 April 2024

Software Version 2.6.11

## What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC web application. Below are the latest updates being released.

## General / Comms

- Network Setup screen - fixed Reset button not working (EDC-91).

## Catalogue

- Fixed an issue where two (or more) MMDs were downloaded with separate catalogues, and the same NPC was showing multiple times.

## eDC

- Pasting Requisition Data now pastes in the correct order (EDC-98).
- Fixed an issue where entering an invalid requisition point when in Only Show Req Points with Data Mode would remove that option (EDC-459).
- Fixed an issue where adding a product from the Catalogue didn't display the on-screen keyboard for inputting the quantity (EDC-460).
- Fixed a screen refresh issue when removing the Stock Chk option when within a Manual replenishment type requisition point (EDC-914).

## eDC Gold

- Fixed the Android Keyboard not disappearing on occasion after scanning barcodes (EDC-253).
- Fixed an issue where after deleting an associated barcode, the old associated product would still be selected in the Planned Receipt order list in the initial receipt screen (EDC-377).
- Fixed crash when entering eDC Gold screens where there is no barcode association within the MMD (EDC-548).
- Fixed issue in Pending Transactions causing data loss where there is no Expiry Date attribute defined on a product (EDC-996).
- Fixed Sending Store getting stuck if deleting and reassigning the only barcode associated in the MMD (EDC-1107).
- Fixed Planned Receipt bringing up incorrect Order rather than the one selected if barcode is scanned after order is selected (EDC-1043).

- Removed the ability to enter more than 1 for serial tracked items in all screens (EDC-1059).
- Removed the quantity buttons from all Gold screen when the product is defined as Serial tracked (EDC-1064).
- MPC and GTIN in Preferences now only show if the Stock or Local Catalogue are downloaded (EDC-1108).
- Fixed on-screen keyboard not being dismissed if selecting Home after entering a quantity within a Gold screen (EDC-1113).
- Now able to Write Back serial tracked products if that serial number has zero-stock but has been in stock before (EDC-1191).
- Now able to “Add New Item” a serial tracked product within Stock Check if that serial number has zero-stock but has been in stock before (EDC-1192).
- Fixed an issue when scanning a barcode (GTIN) which is manually associated the software would bring up a product with that barcode from the Catalogue (EDC-1202).
