

eDC Android Release Notes

21 June 2022

Software Version 2.6.1

What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC android devices. Below are the latest updates being released.

General

- A new 'busy' spinner has been added to indicate when the application is busy processing data or commands (EDC-597)

eDC

- An incorrect requisition point can no longer be selected after the initial selection which does not make the processed order invalid (EDC-652)
- In manual requisition points the 'A' flag has been removed when changing a data line (EDC-70)

eDC Gold

- The scanning issues has been resolved where the length of batch or serial numbers are 20 characters and subsequent attributes were not recognised (EDC-595)
- After scanning individual attributes, not auto-selecting scanned barcode data making the subsequent scans incorrect has been resolved (EDC-604)
- Return to stock now sends Client Data on sending store (EDC-84)

Should you have any further questions, please contact the NHS Supply Chain Helpdesk via email at cshelpdesk@supplychain.nhs.uk or telephone 0845 680 4357.
