eDC Android Release Notes

29 June 2023

Software Version 2.6.8

What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC android devices. Below are the latest updates being released.

General

- Local Catalogue: Fixed Supplier Reference being incorrectly labelled as GLN (EDC-958).
- Local Catalogue: Fixed product description being cut off when it's at its max length (EDC-959).
- Local Catalogue: Added wrapping to Brand and Contract fields (EDC-960).

eDC Gold

- Made further refinements to the "mark as complete" option to ensure the correct state is remembered through screen changes (EDC-895).
- Corrected the "Issue UOM" field to correct show the "Issue UOM" rather than the "Receipt UOM" (EDC-955).
- Pending Transactions: Fixed a crash when changing the Client within an Issue transaction (EDC-961).
- Pending Transactions: Fixed an issue where long Batch Numbers were being cut off (EDC-964).
- Pending Transactions: Fixed an issue in Return to Supplier transactions the Reason was being defaulted to "Expired" rather than the Reason recorded (EDC-977).
- Pending Transaction: Fixed a crash when selecting the radio button in the Reason selection menu. The radio button has been removed as it is not required (EDC-995).
- Stock Check: Fixed an issue where the product attributes were missing after adding an item through "Add New Item" (EDC-962).
- Stock Check: Fixed an issue where the user was able to add the same Serial Number twice (EDC-975).
- All screens: Fixed an incorrect message when trying to add a Serial Number that is already in stock. The message box was showing "Success" rather than "Error" (EDC-1010).
- Renamed and reformatted the UOI fields on various screens to show "Receipt UOM" and "Issue UOM" where needed (EDC-1011, 1013, 1014).
