

eDC Web Application Release Notes

1 September 2022

eDC Web Application Version 1.2.0

What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC web application. Below are the latest updates being released.

eDC

- Within MMD Config, saving a Requisition Point without an External Location selected will no longer cause a Server Error (EDC-413)
- Fixed adding a New MMD when no Warehouse/MMD is selected causing a Server Error (EDC-719)
- Fixed the behaviour of the Create/Edit Req point screen when an invalid Price Break Percentage is entered (EDC-438)
- Fixed an incorrect 404 error when selecting Import Requirements when no other Req Points exist within the MMD (EDC-416)
- Within External Locations the date picker will now correctly validate dates on Chromium-based web browsers (Chrome and Edge) (EDC-599)
- The Transmission time will no longer show within External Location Amend when batch transmission isn't enabled (EDC-764)
- Changed the 'none' feed type to 'Select feed type' in the feed type field. The external location can't be saved when this is selected. (EDC-424)
- Clarified the error message when an invalid IP is entered within External Location (EDC-386)
- Fixed the wrapping of the Location Name field which was obscuring the FTP protocol entry field (EDC-417)
- The new Internal Pick Location column (released in the previous version) will no longer show for Stock and External Demand detail reports (EDC-667)
- Stock and External Demand detail reports have their sort order reverted to Scanned Order (as scanned from the Hand-Held device). Internal Demand detail report remains sorted by Internal Pick Location. (EDC-759)
- Corrected the Total Quantity value to zero decimal places in the Demand detail report (EDC-695)
- Within the Catalogue screen, fixed long supplier names causing formatting issues with the search entry fields (EDC-714)
- Fixed the inability to Search for Stock type products in the Catalogue screen (EDC-756)
- If leaving the Demand Management Screen with unsaved changes a warning will now show (EDC-769)

eDC Gold

- Within Manage Hierarchy it's no longer possible to make Stores active or add new Stores within Inactive Sites (EDC-708/390)
- Increased the upper limit to the Store's Receipt Lead-time field to 100 days (from 20 days) (EDC-716)
- Removed the Description column being used for filtering when filtering by NPC/GTIN within the Transaction Log (EDC-720)

Reports

- Requisition Reports – The Demand Created from and to fields are now labelled Red to indicate they are mandatory. (EDC-678)
- Order Status Report (Gold only) – Second attempt (from the Previous release) to remove the non-receipted zero outstanding order lines from the report (cross-docked orders) (EDC-754)
- Order Status Report (Gold only) – Excel Export – The Expected Delivery date column is now set to the proper Date format (EDC-692)
- Order Status Report (Gold only) – In Firefox browsers, restricted the date to 365 days previous, which is already restricted in other browser types (EDC-694)
- Order Status Report (Gold only) – The data returned in the report is now Inclusive of the date entered in the Date From field (EDC-713)
- Authorisation Report – Excel Export – Corrected the formatting of the Price and Max value columns (EDC-700)
- Stock Status Report (Gold only) – PDF version – Incorrect stock values now fixed (EDC-705)

Should you have any further questions, please contact the NHS Supply Chain Helpdesk via email at cshelpdesk@supplychain.nhs.uk or telephone 08456 804 357.
