eDC Web Application Release Notes

18 September 2025
Web Application Version 1.30

What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC web application. Below are the latest updates being released.

eDC

- Local Catalogue - A warning will now appear when changes are made within the Supplier dialogue box and when the "X" is used to close. (EDC-395)
- Requisition Report (PDF and Excel) - Username added to the order header of the user who processed the demand. (EDC-1334/1335)
- Global Edit - Fixed a server error when a report is generated for a Req Point belonging to a different Warehouse from where the selected MMD is situated. (EDC-1353)
- Global Edit - Fixed a server error when processing a scaled product, resulting in a value above the maximum allowed re-order level. A proper error message is now shown. (EDC-1370)
- **New enhancement:** Now able to mass select the Authorisation tick boxes using the tick box in the table header. (EDC-510)
- Fixed various validation bugs within the Local Catalogue bulk importer. (EDC-813)
- Fixed the pagination resetting to 10 after clicking search in the Catalogue screen. (EDC-1174)

eDC Gold

- Order Status Report - PDF version - The NPC and MPC now properly wrap if they are too long. (EDC-1173)
- Transaction Report - PDF version - The NPC and MPC now properly wrap if they are too long. (EDC-1244)
- Barcode Imports - The GS1 barcode type has been fixed to prevent letters from being accepted. (EDC-1198)
- The transfer screen is fixed so that it no longer shows which destination store is the same as the sending store. (EDC-1240)
- Stock Status Report - PDF version - No longer shows batch lines for batches previously in stock. (EDC-1256)
- Stock Status Report - PDF version - Long MMD names are no longer cut off. (EDC-1345)
- Changes made to improve performance when duplicate serial number checking. (EDC-1262)
- Fix to prevent duplicate Put Aways from being created when importing serial-numbered receipts from Android devices. (EDC-1301/1331)

- On the requirement summary screen, fixed where if filtering by Req Point on an empty / new Req Point, the Req Point wouldn't show, even if Display All was selected. (EDC-1361)
- Fixed an issue on the Global Edit screen, and using Quick Add to add products, not all Req Points would be listed that have those products assigned. (EDC-1374)
- Stock Take Report: Removed lines that only contain zero. (EDC-1404)
- Fixed the issue where various screens would go out of alignment (depending on browser zoom level) (EDC-1430)
- Increased the limit for a Pack Size in the Local Catalogue to 32,500 (from 10,000). (EDC-1436)
- Stock Definition edit item information warning now correctly includes that the Issue UOM cannot be changed. (EDC-433)
- Fixed the default store warning days indicator below the removal if there is an error on saving on the Stock Definition screen. (EDC-437)
- Fixed single active Store not being selected if other Stores within the Site are inactive (EDC-439)
- When receipting in a serial number that already exists within the MMD, the failed transaction log will now show the correct store the serial number is located in. (EDC-973)
- Fixed the copy record option not being able to be processed in the Issue screen, due to an apparent invalid quantity. (EDC-1163)
- Removed the superfluous ">>" button from the Receipt screen. (EDC-1181)
- Fixed the Barcode import failure screen, which never showed any failures. This screen will now populate when a conflicting barcode is uploaded, giving the user the option to overwrite the original or ignore the new assignment. (EDC-1185)
- In the Planned Receipts, fixed an issue where copying would toggle the Mark as Complete option on and off. (EDC-1186)
- Fixed the issue that prevented the ability to search for descriptions in the Return to Stock screen. (EDC-1187)
- Stock Definition importer is now less likely to timeout with an Ajax error. (EDC-1194)
- Inserted a notification message on the Issue screen to indicate that personal data should not be input into free-text fields (data protection reasons). (EDC-1438)
