

eDC Web Application Release Notes

27 June 2023

eDC Web Application Version 1.24

What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC web application. Below are the latest updates being released.

eDC

- Masked Product indication will now be shown when setting requirements through the Demand screen (EDC-979).

eDC Gold

- Orders processed through the eDC Gold Middleware (orders generated from Issue Transactions from the Android Device) will now appear within the Requirement Report (EDC-974).
- Fixed issue where Batch Numbers have been stored for products not being tracked as Batch and are causing failures when transacting those items (Web and from Android) (EDC-986).
- Fixed Return to Stock screen incorrectly showing Inactive Stock Definitions, allowing those items to be added back into stock (EDC-1007).
