

eDC Web Application Release Notes

18 April 2023

eDC Web Application Version 1.23

What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC web application. Below are the latest updates being released.

eDC

- New Feature: When a product is masked within Online Catalogue and Ordering, eDC now displays a message to inform the user that the product is masked. This information will appear within the Requirement Authorisation screen and the Requirement Create and Edit screens. This is for informational purposes only and does not prevent the eDC user from creating the requirement and/or ordering the product (EDC-868/869/949).

eDC Gold

- Corrected the spelling error of GTIN within the Stock View screen (EDC-454).
- The Requirement Report can now be sorted by Group Key (EDC-497).
- The Stock View screen now shows prices to two decimal places (EDC-763).
- A Shelf-Life Warning will now appear when receipting where the Stock Definition is using the Store's default Receipt Shelf-Life Warning Days (EDC-825).
- The Stock Definition Export (on the Stock Definition screen) now includes an Active column. If the Show Inactive option is enabled in the Stock Definition screen, this will now show in the Excel Export whether the Definition is active or not (EDC-918).
- The Stock Status PDF report no longer shows the incorrect expiry date of 20/12/1899 for non-expiry tracked products (EDC-937).
- In the Transaction Log and Import failure pages the NPC and Amended filter type fields can now be actioned by selecting the return key (EDC-938).

Should you have any further questions, please contact the NHS Supply Chain Helpdesk via email at cshelpdesk@supplychain.nhs.uk or telephone 08000 868 670.
