

eDC Android Release Notes

9 November 2021

Software Version 2.4.0

What's New?

In response to customer feedback, we regularly work on various bug fixes and performance improvements for our eDC android devices. Below are the latest updates being released.

General

- Added better redundancy into the Load MMD process

eDC Requirements Data

- The Group Key no longer disappears

eDC Gold

- Fixed incorrect duplication of transactions
- Within Stock Check you can no longer enter more than one for a serial tracked item using the on screen keyboard
- Added more reasons to the Write Back reasons list = Stock Found, Returned Stock, Consignment Swap In, and Other
- Improved the layout of the eDC Gold product and batch list screens to increase the visible data
- EAN-13, EAN-8 and IFT-14 barcode types not being transferred into the barcode scan field if scanned into the batch or serial number fields
- Scanning barcode into the initial receipt screen now shows the filter sales order number even if purchase order number is selected
- No longer able to enter more than 24 characters in the batch and serial number fields in the receipt, receipt edit, write back and stock check add new item screens.
- Fixed scanning barcode with batch/serial number, not selecting batch/serial number automatically. Note, if batch/serial number is not found, the batch list will show instead
- The following screens will now return straight back to the product list rather than show the batch list after confirming the transaction (clicking Done): Issue, Write Off, Return to Supplier, Transfer. This will save the user the extra unneeded click on the back arrow
- Fixed the column width changes not being persistent between screen changes. The widths should only now be reset if you leave to the main menu
- Added product receipt unit of issue to all the product screens
- Fixed the incorrect product being highlighted when returning to the product lists
- Fixed where scanning HIBC barcodes were not selecting products with punctuated MPCs (catalogue must still be loaded)

Should you have any further questions, please contact the NHS Supply Chain Helpdesk via email at cshelpdesk@supplychain.nhs.uk or telephone 0800 086 8670.
